

BOOKING APPOINTMENTS

We have multiple veterinarians and specialists to serve you. We can schedule appointments by phone or online. If you prefer to see one or two veterinarians consistently, we are happy to accommodate.

SAME DAY APPOINTMENTS

We have a team dedicated to Same Day Urgent Care Services so we can accommodate those pressing issues that just can't wait. There is an additional fee for same day service to offset the cost of having a doctor and support staff available. We will always do our best to fit you in, however, if our Same Day service is full we will refer you to a local emergency hospital. Please call ahead so we can be prepared to meet your pet's needs

PRESCRIPTIONS

We are happy to refill prescriptions from our clinic within 24 hours. You can submit refill requests via our website, email, or by phone. Please note that in order for us to refill medication, we must have a valid "Veterinarian-Client-Patient Relationship". This means we must have done a thorough assessment of your pet and their current health status within a reasonable amount of time. This could vary from one year for healthy pets to a day or two for pets with a serious illness.

Welcome to our
community!

We have been helping people and pets in Victoria since 1988. We are very happy to welcome you to our community.

We Offer:

- * Office appointments
- * House Calls
- * Same day appointments for urgent care
 - * Surgery
 - * Dentistry
- * Behavior consults
- * Ultrasounds
- * X-Rays
- * Specialized on site laboratory

Several of our doctors have special interests in areas such as dentistry, dermatology, oncology, and internal medicine.

We have board certified specialists in ophthalmology and dentistry available at our clinic on a regular basis.

Make sure to check out our social media for info, contests, and photos!

WE ARE COMMUNITY

SURGERIES

We schedule surgeries seven days a week. Patients are cared for by a dedicated team while they are in hospital, and go home the same day. We strive to reduce stress by minimizing the time pets are in the hospital, utilizing specialized pain management and anesthetic techniques, and staying in contact with you frequently throughout your pet's stay. Complicated cases can be referred to a specialist if needed.

DENTAL PROCEDURES

Several of our doctors have advanced training in dentistry and oromaxillofacial surgery. We have specialized equipment and follow the highest standards. Dental specialists come to our clinic on a regular basis to take care of complex cases.

ULTRASOUND SERVICE

Ultrasounds can be performed in our clinic. When an ultrasound is booked, we will send you an information sheet outlining the procedure.

LABORATORY TESTS

We have a large in house laboratory, and our highly trained technicians can perform many tests on site. We also send samples to diagnostic labs on the lower mainland. take blood pressure measurements, etc. Most test results are available within 24 hours. Your veterinarian will call you when the results are available. There is no charge for this follow up phone consultation.

We do not accept samples for analysis without prior examination/consultation by a veterinarian.

HOUSE CALLS

We offer house calls six days a week. House calls work especially for reducing stress in nervous or frail patients and can provide most of the same services that we offer in the clinic, including collecting laboratory samples. They are more convenient for people and pets with mobility challenges as well as multi pet households
